

KARAN MALHOTRA

karan.malhotra.eng@gmail.com | +91 99887 76655 | Gurugram, India | linkedin.com/in/karanmalhotra-eng

PROFESSIONAL SUMMARY

Senior Backend Engineer with 8+ years of experience architecting distributed, high-availability systems at scale. Deep expertise in Java, Go, microservices, and cloud infrastructure, with a track record of leading engineering teams.

SKILLS

Languages: Java, Go, Python, SQL

Frameworks: Spring Boot, gRPC, Kafka Streams

Infrastructure: AWS, Kubernetes, Docker, Terraform

Databases: PostgreSQL, Cassandra, Redis, DynamoDB

WORK EXPERIENCE

Staff Software Engineer — Orbital Payments Inc.

Jan 2022 – Present | Gurugram, India

- Architected a payments processing platform handling 5M+ transactions/day with 99.99% uptime
- Led migration from monolith to 20+ microservices, cutting deployment time from 2 hours to 8 minutes
- Mentored a team of 6 engineers and drove technical roadmap for the core platform group
- Reduced infrastructure costs by 28% through autoscaling and right-sizing Kubernetes workloads

Senior Software Engineer — Falcon Systems

Jun 2019 – Dec 2021 | Bengaluru, India

- Designed event-driven architecture using Kafka, processing 10K+ events/sec
- Built internal observability platform adopted by 12 engineering teams
- Owned on-call rotation and reduced P1 incident MTTR by 45%

Software Engineer — Falcon Systems

Jul 2017 – May 2019 | Bengaluru, India

- Built RESTful APIs for the core order-management system used by 500K+ merchants
- Improved database query performance by 60% through indexing and query optimization

PROJECTS

- OpenLedger — Open-source double-entry accounting engine written in Go (600+ GitHub stars)

EDUCATION

B.Tech in Computer Science — Delhi Technological University, 2017

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA), 2023
- AWS Certified Solutions Architect – Professional, 2022
